

**Improving the quality and accessibility of health care services provided in pre-school and school education institutions in Jurbarkas District Municipality**

Elektrėnai Municipality Public Health Bureau together with partners Jurbarkas District Municipality Public Health Bureau and Prienai District Municipality Public Health Bureau is implementing the project “Improvement of Health Care Services in Elektrėnai, Jurbarkas and Prienai Municipalities Schools and Pre-schools”.

The aim of the project is to provide pre-school and school health offices with methodological tools to ensure the well-being of children and young people.

During the project it is planned to carry out simple repairs in Elektrėnai, Jurbarkas and Prienai pre-school and school education institutions. The condition of the cabinets to be repaired is very poor, the walls are crumbled, the floor is worn, the insulation is poor and there are other problems. After the repair of the premises, the health offices will be fully adapted to the activity and will meet all the requirements.

During the project, it is planned to acquire the necessary tools to provide quality services. All health offices are equipped with kits. The equipment in most classrooms is outdated and unusable, which is why goods will be purchased that meet modern health care requirements and the needs of students and kindergartens.

Acquired methodological tools for health offices will include tools for mental health promotion, tools for public health risk factors, tools for developing healthy lifestyle skills, information and communication technology tools and other methodological tools.

The results of this activity will be used by health care professionals working in those offices and by children and students.

The project is funded by the European Economic Area and Norwegian Financial Mechanisms LT03 Health Program. Call number / tool - LT03-2-SAM-K01

Project value: EUR 243 750.06
